Profit from our summer promotions:

Cool promotions for those that stay in over summer

With the cap on the Euro lifted by the SNB, the pressure on the economy increases. More and more often contracts are placed abroad for economical reasons. In order to remain competitive, laboratories, too, have to work more efficient while not risking their good reputation: the quality of the analysis, the reliability of the results has still top priority.

infochroma is your address for products of high quality at attractive prices. And all of those that stay in over summer, have reason to be pleased with our customary summer promotions, which you will find on the next page.

In time for the Swiss National Holiday - and popular with all those «true patriots» or «acknowledging Swiss fans» - we replicate our offer of storage vials in the 100 pcs box arranged in the colours of the Swiss Cross. In addition, you receive a terracotta garden gnome from the infochroma garden gnome collection free of charge with your order of storage vials over a value of 200 CHF (to take advantage of this offer please place the promotion-code iZ15 on your order).

Still effective is the HALO®-5 summer promotion. But the countdown is on: Only until Friday 31. July 2015 (17:00) will you profit from the 35 % discount on all HALO®-5 columns and guard-columns. Thanks to the so-called Fused Core Technology, this column achieves a faster separation with a higher resolution than a conventional column. Find out more on our website under: www.infochroma.ch/eng/hplc/halo5.html. Don't hesitate. Stock up - now is the ideal moment (to take advantage of this promotion, please place the promotion-code HALO515 on your order).

And if you've been sweating over your labour and need a change of T-shirt, check out our chemoline shop (www.chemoline.ch). There you'll find groovy t-shirts for all seasons. How about the quite seasonal T-shirt «Hot»? Or would you rather have the T-shirt «Explosives»? With those you most certainly have the proper outfit for the 1. August celebration.

We wish you a great summer time and much success for the second half of the year.

best regards
your infochroma ag
